

Understanding Privacy Legislation:

How It Enables Information Sharing

Provided by: Information Sharing Training Initiative
(Formerly Information Sharing Training)

Is this training for me....

On your job have you ever...

- *felt that 'privacy legislation' is too restrictive and creates a barrier to providing effective services to your clients?*
- *asked another organization or individual to share or disclose a client's personal/health information? Have you become frustrated when they refused because of Privacy Legislation?*
- *wondered if you have the right to collect all the personal/health information that you do?*

Providing training on a cross-sectoral basis to ensure that there is some common understanding of how the various pieces of privacy legislation allow for the delivery of services to children, youth, adults and families in an integrated or collaborative manner. The initiative is comprised of delivering training to staff in organizations (GOA, PUBLIC, PRIVATE, AND NON-PROFIT) that deliver services to children, youth, adults, and families.

Scheduled Dates
